## BERNARD DISCIPULO

### TECHNICAL MANAGER

Bernard is a highly skilled and experienced construction and CAD engineer, with extensive experience in New Zealand and internationally. Working across, infrastructure, civil, electricity generation, residential, commercial and agricultural construction projects, has provided Bernard with a vast array of experiences and knowledge.

With significant design, engineering and quantity surveying experience Bernard is able to support the team across all aspects of the project from estimation and cost planning, detailed design and engineering to procurement and completion to technical specification.

A team player, able to build strong relationships with Council, clients, consultants and site based construction teams, Bernard will ensure all technical aspects of the project are accurately designed, coordinated and completed to the highest quality.

### RESPONSIBILITIES

As Technical Manager, Bernard is responsible for determining construction methods, materials and quality standards, and drafting and interpreting specifications, drawings, and communicating construction and design details to site managers and construction crews.

### QUALIFICATIONS

Bachelor of Science in Civil Engineering (1994)
