GARY SWINDALE

DIRECTOR

Gary commenced trading independently in 2004, specialising in the design and construction of medium to large scale industrial and specialist agricultural buildings nationally.

Responsibilities are all encompassing for a medium size construction company including business generation, client liaison, budget pricing, feasibility planning, design management, tendering, construction management, health & safety, and contract administration.

Novasteel has a long term joint venture arrangement with a number of highly skilled construction crews that manage the site functions for the business.

Novasteel is recognised as the largest constructor of specialist Poultry and Agricultural Industry buildings across New Zealand and has constructed in excess of 250 broiler houses, breeder houses, rearing houses, quarantine buildings, egg layer houses, egg stores, free range grower houses, cool stores and industrial buildings.
